STD:OBD IFH with DCAN-USB Cable for F-Series, as example for INPA. Tool32, NCS	6

## ENET IFH with ENET-Cable for F-Series and newer, as example for INPA64, Tool64 ...

- 1. Reserve ICOM with ITool Radar
- 2. If need change Remotehost = "Autodetect" to IP from your ICOM

C:\EC-APPS\EDIABAS\BIN

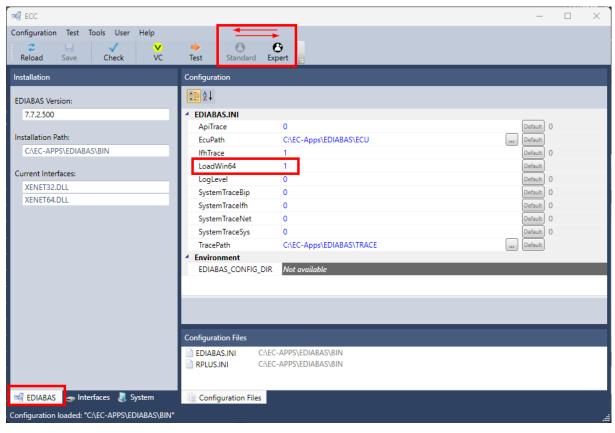

RPLUS.INI

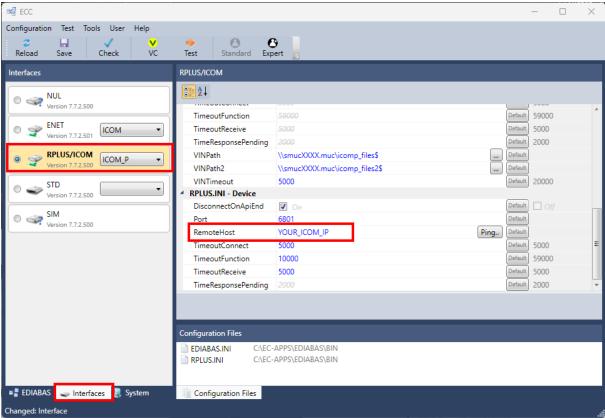

Configuration Files

■ EDIABAS Interfaces System

Configuration loaded: "C:\EC-APPS\EDIABAS\BIN"

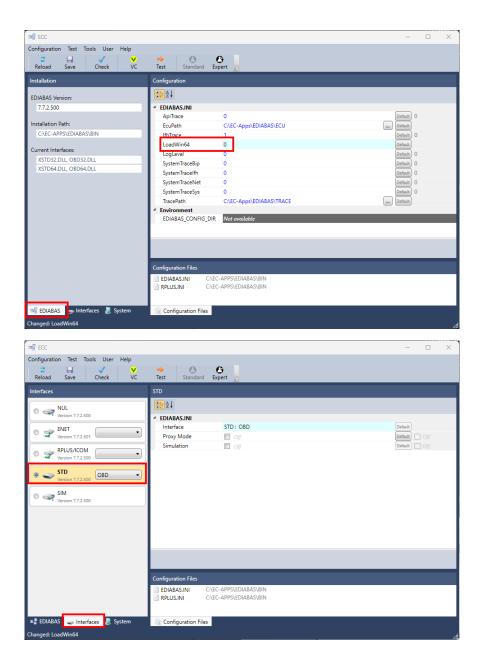

- 1. Reserve ICOM with ITool Radar
- 2. Change Remotehost = "YOUR\_ICOM\_IP" to IP from your ICOM

RPLUS:MOST\_ASYNC IFH (MOST) with ICOM Next + ICOM-B for E-Series for WinKFP

Placeholder

Set right USB-Port from your DCAN-USB Cable in C:\EC-APPS\EDIABAS\BIN\obd.ini

```
□ [OBD]

Port=Com3

Hardware=USB

RETRY=ON

;Tracelevel=0xFFFFFFFF

;Tracelevel=0xFFFFFFFF

;Tracelevel=0xF0000000

;Tracelevel=0x0000FFFF

; Bit 0 = Funktionsaufruf

; Bit 1 = io Ergebnis

; Bit 2 = nio Ergebnis
```

Don't forget set Latency in Device Manager to 1ms
